

AN ACCURATE WAY TO ACCELERATE YOUR SCHEDULE

WHAT'S IN YOUR CONCRETE?

WOULD YOU LIKE TO PREDICT...

Strength?

- Remove formwork sooner
- Stress post-tensioned slabs earlier

WOULD YOU LIKE TO KNOW ...

Curing Behavior?

- Monitor mass concrete with live temperature alerts
- Help reduce heating costs in cold weather

Most Accurate Strength

We test your mix design in our state of the art lab, making it simple for you to get reliable real-time and predictive strength calculations to help you move faster

Best-in-Class Reporting and Alerting

Take action before there is a problem and resolve conflicts knowing what is actually happening to the concrete

All-in-one solution: Strength & Temperature

Simplicity is critical on a job site and we offer the only all-in-one solution, giving you one less thing to worry about

Reliable Data Collection

Our Hilti Concrete Sensors can go deeper in concrete, and Hilti Gateway collects data even when you are not at the jobsite

CONCRETE SENSORS

A Comprehensive Solution

- Completely wireless
- Measure strength and temperature all in one sensor
- Durable and reliable sensors
- Data collection manually or automatically
- Simple to install and set up
- The most actionable database for predictive concrete behavior
